Mini Symposium Title	Machine learning in damage mechanics
Short description on the focus of the Mini Symposium	The mini-symposium aims to provide a platform for discussion of the newest developments of damage mechanics theories and methods associated with machine learning. It is believed that physics and data driven models are one of the new trends of damage mechanics.
Organizers	Zhihong Zhao, Tsinghua University (zhzhao@tsinghua.edu.cn) Wei Wu, Nanyang Technological University (wu.wei@ntu.edu.sg)
